

Parkland College – ICTM Regional Math Contest

INFORMATION FOR NEW COACHES

1. Although this is a high school competition, Parkland College allows seventh and eighth graders. If your school registers only seventh and eighth graders, then you do not have to register your school with ICTM in the fall, or pay their fee. (You will still register your individual students with Parkland College in the spring, and pay Parkland a small fee.)
2. Your school will receive a mailing in January from Parkland College explaining how to register your individual students for their competitions on Parkland's math contest website. We no longer use paper registration materials.
3. Please be sure to read the Supplementary Rules. It contains important information.
4. Schools registering for the first time with ICTM will automatically receive from ICTM a contest manual and a set of questions from last year.
5. It is the coach's responsibility to obtain the orals reference materials, if desired. Neither the regional sites nor the state committee can provide them.
6. Special Needs

All request pertaining to special needs, including requests to use foreign language dictionaries, must be received in writing by the State Math Contest Chair by February 1 for the regional competition and by April 1 for the State Competition. For more details, go to www.ictm.org
